UNITED STATES INTELLIGENCE BOARD
COMMITTEE ON DOCUMENTATION

MEMORANDUM FOR: Task Team I Members

SUBJECT: Comments on Content Control Code

1. Attached are comments received from [redacted] concerning substantive problems encountered during the application testing and suggested changes to the content control code.

25X1

2. [redacted] provided suggested changes to the code in Section B of the paper she distributed at the last meeting. [redacted] in a telephone conversation noted the possible need for an import/export modifier to be used in conjunction with specific commodity category codes as well as with the general IPIN category code. He also suggested that WARE be divided into Inland Waterways and Maritime segments in response to DIA structuring. In this context dams which might at present fall either under HEWE, for flood control, or AGRI, for water conservation, might fall more naturally under Inland Waterways. [redacted] also recommended that chemical, biological, and radiological warfare agents and techniques be moved from their basic categories in Section 3, Science & Technology and placed under their own notation in Section 7, Armed Forces. He also felt that the phrase Economic Warfare; strategic commodity listings, embargoes, and international boycotts be moved from the scope notes under FGRF to IPIN under Section 4, Economics. [redacted] also pointed out that TCOM is an extremely large category which appeared to need more specification either through the use of additional modifiers or category subdivision.
